INSTALLATION TIME: 10 minutes

SEATING & FLOORING

PREPARATION

Clean the surface of the acrylic for installation. If the mat is being installed on a new acrylic surface, then clean well with denatured alcohol. If the acrylic fixture has been previously installed, clean with approved acrylic cleaners first, then clean with denatured alcohol, making sure there is no soap residue left behind.

STEP 1

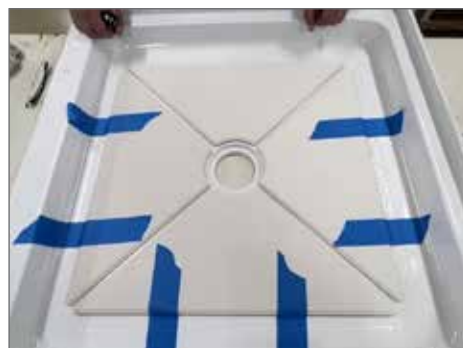

Score lightly through the back side of the white release paper in the center of the mat, making sure not to score too deeply to avoid cutting through the mat.

Step 1

STEP 2

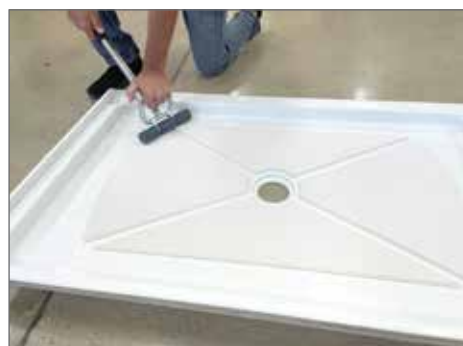

Test fit the mat and position into the desired location. Then apply painter's tape around perimeter of the mat to anchor it temporarily in place. Once secured with the painter's tape, lightly pull back the face of the mat and starting from your score mark peel back the release paper revealing the self-adhesive. Then firmly start laying it down into the desired position. Once half the mat is stuck, remove the painter's tape, and repeat for the second half until the mat is completely adhered to the substrate.

Step 2

STEP 3

Using a small roller or just applying firm pressure with your hands, flatten mat to ensure that the adhesive makes contact with the entire acrylic surface. Be sure to press down around the edges of the mat to prevent any chance of water penetration.
